

Das Projekt **KLIMAfuchs** ist als Bildungsmaßnahme im Hamburger Klimaplan verankert. Die Sozialbehörde der Stadt Hamburg unterstützt das Projekt KLIMAfuchs aus Hamburger Klimaschutzmitteln.

Der **KLIMAfuchs** bietet allen Hamburger Kitas Unterstützung, um Klimaschutz und BNE im Kita-Alltag zu verankern. Die Themen und Angebote sind vielfältig und können von den Kitas individuell gewählt werden.

TIPS

ENGLISH/ENGLISCH

SAVE
ENERGY

ELECTRICAL APPLIANCES

- Disconnect all appliances from the power supply when they are not in use!
- Use smartphones, tablets and laptops for as many years as possible instead of buying new devices regularly.

KLIMASCHUTZ!

IN THE KITCHEN

- Buy new refrigerators and freezers that are as small as possible.
- Buy the highest efficiency class ("A").
- Do not place refrigerators next to the stove or heater.
- Set the fridge to 7°C, which is enough to keep things fresh. Set the freezer to -18°C.
- Keep refrigerators as full as possible, e.g. even with water bottles, to capture coldness.
- Open the door as briefly as possible.
- Boil only the amount of water that is needed.
- Put the lid on the pot and use the residual heat to finish cooking.

SAVE ENERGY

Energy – such as electricity and heat – is produced for our daily needs. Yet this is very costly and emits greenhouse gases, especially when fossil fuels are used.

There are many ways to save energy at home and thus actively contribute to climate protection!

IN THE BATHROOM

- Select a water temperature as low as possible.
- Run the water for as short a time as possible.
- Install water-saving inserts in the shower and washbasin.
- Wash clothes only at 30°C.
- Use a clothes line instead of a dryer.

HEATING AND COOLING

- Set the heating to a maximum of "3", which corresponds to 20°C.
- Keep radiators clear and do not place anything on them.
- Avoid using air conditioners or fans; instead, ventilate the room by opening all windows for a short time and ventilating crosswise.
- Check window seals and replace if necessary.

LIGHTING

- Choose LEDs as a lighting source.
- Use daylight as long as possible.
- Switch off the lights when no one is in the room.
